PROFILE

An aspiring creative director recently graduated from Loughborough University with an Upper Second Class Honours (2.1) in Graphic Communication. A reliable and conscientious hard worker with great experience in drawing skills and a variety of design software tools.

Designed websites and logos for small online businesses since about the age of 18 in order to earn money in my spare time. I currently run my own site to help promote this, which I am in the process of redeveloping and can be seen at www.smtdesigns.co.uk.

As a graphic design student I am used to working in a studio and working with others in a team to develop projects as well as being able to comfortably deliver presentations and ideas to colleagues.

Ambitious, fun and likeable person and love to impress people with anything I do or produce.

Continued at Loughborough to study a Masters Degree in Art and Design focusing on the aesthetics of sport utilising photography and videography including lighting and directing. In addition to this I have developed excellent skills in video software editing programs such as Final Cut Pro and Motion etc. In order to fund this degree I was awarded a bursary for recognition of my potential as a creative artist.

EDUCATION & QUALIFICATIONS**Masters**

MArt & Design (studio practice)
2008-2009 Loughborough University

Batchelors

BA (Hons) Graphic Communication
Upper Second Class Honours (2.1)
